XIV. Illustrative of Messrs. D. Banerji and R. Ganguli's Paper on the Distribution of Space-potential in Striated and other Forms of High-frequency Discharge.

XV. & XVI. Illustrative of Prof. J. Kuno's Paper on the Application of the Law of Photo-elastic Extinction to some Problems.

XVII. & XVIII. Illustrative of Prof. E. A. Owen and Mr. J. Iball's Paper on the Precision Measurements of the Crystal Parameters of some of the Elements.

ERRATA.

December 1931:

Page 1159, line 18, *for* The noted pore volume,
read The total pore volume.

Page 1168, line 20, *for* amount of sulphuric acid,
read amount of sulphur dioxide.

February 1932:

In the paper on "Activities and the Standard State" all the terms in curved brackets on pp. 288–290 should be differentials; thus equation (13) should read:

$$\left(\frac{\delta \ln a}{\delta T}\right)_{p,N} = -\frac{\bar{H}}{RT^2}.$$
